## PROJECTS

### nature tour & travel, 6 Months

This full stack web application is specially designed for persons who love travel and going on tour vacations  
Integration: StripeApi, MapBox , Gmail  
Implemented different types of events to reduce the load on single resource is result in performance improvement  
integrated with Stripe for payment  
Implemented login & logout feature  
A visiting user who has not yet created an account on the app can see all the tours as well as detailed information about each tour  
Once signed up or logged in, they can then book any tour of their choice  
Users can write only one review for any tour they book.
